

My passion thought for mankind and for tomorrow's world

Friday 11 april, 13.00-17.00 TNO Utrecht

Recruitment day

Thought for mankind and for tomorrow's world. This means that we here at TNO Built Environment and Geosciences, at the locations in Delft and Utrecht, are working on social topics, and focusing special attention on mankind, sustainability and economics. As a starter with a Master's or PhD level of education, you will be able to conduct project-based applied research for government and commercial organizations, both nationally and internationally. TNO also gives you the unique opportunity of starting out as a trainee.

On Friday 11 April from 13:00 to 17:00 you will have the opportunity of taking a peek behind the scenes at TNO. You will be given an interactive introduction to the working scope of the business

units. There will be stands and presentations on topics including Energy, Living Environment, Building, Climate, Accessibility and Water, as well as on the possibility of becoming a trainee. A speed date procedure will allow you to exchange information swiftly, and us to make an initial selection.

For more information and registration, go to TNO.nl/careers. You can register until 24 March. If your background captures our imagination, you will be sent an invitation to come to Utrecht as our guest on 11 April.
